## Notes for Examining Physician

**WEIGHT.**—Males, without clothing, and also in ordinary clothing without overcoat or hat (weigh twice); females, clothed, but without wrap or hat. If overweight, state whether due to bone and muscle or to fat.

**HEIGHT.**—Without boots or shoes; observe that no appliances are used to increase.

The examination should include the following observations:

1. **Eyes.**—Ptosis; discharge; corneal scar; pterygium. In recording distant vision consider 20 feet as normal and report all vision as a fraction with 20 feet as numerator and the smallest type read at 20 feet as denominator. If glasses are used, record for each eye the finding with and without glasses. Near vision must be reported. In testing vision without glasses the applicant or appointee should be instructed to remove the glasses at least one-half hour before testing uncorrected vision.

2. **Ears.**—Evidence of middle ear or mastoid disease; condition of drums; discharge. In recording hearing, record 20 feet as normal distance for conversational voice and record deviation from normal as fraction with 20 as denominator and actual distance as numerator.

3. **Nose.**—Ability to blow through each nostril. If free, a speculum examination would not be indicated.

4. **Mouth and throat.**—Missing teeth; pyorrhea; tonsils, hypertrophy or disease.

5. **Gastro-intestinal.**—Ulcers, inflammations, etc.

6. **Thyroid.**—Presence of tumor in neck and tremor, exophthalmos; nervous high-strung disposition, especially in women.

7. **Heart.**—Murmurs. State whether functional or organic. If valvular disease exists, state whether or not it is fully compensated. Arteriosclerosis.

8. **Lungs.**—It is necessary that the auscultatory cough be used. If tuberculosis is present, state whether active or arrested; if arrested, state your opinion as to how long it has been quiescent. Sputum to be examined for tubercle bacilli in all suspected cases.

9. **Hernia.**—Give details as to size, location, etc., and whether well-fitting truss is worn. Inguinal hernia exists when ring is enlarged and on coughing visceral impulse is felt which follows the finger on withdrawal.

10. **Varicocele.**—If varicocele is present, state approximate size—e. g., size of walnut, lemon, etc.

11. **Flat foot** of such a nature as to incapacitate or become aggravated by work or be alleged later to have been caused by accident or occupation. By "flat foot," as used in this form, is meant a weak foot with impaired function, the term being equivalent to "fallen or misplaced arch," an abnormal condition. Impairment of function is the point to be noted. An anatomically flat foot, but strong, is not disqualifying.

12 and 13. **Scars, deformities, atrophies, and paralyses** should be noted, but it is not important that small insignificant scars or blemishes which might be referred to as marks of identification be recorded.

14. This entry should include symptoms and full history of any mental or nervous abnormality.

15. **Urinalysis** to be made in case of persons over 40, and in all cases where arteriosclerosis, nephritis, or diabetes is suspected.

Re: EDWIN RAYMOND TULLY  
Applicant - Messenger

Dear Sir:

The above applicant, who resides at 756 Union Street, Brooklyn, N. Y., was interviewed at this office on June 2, 1941, by Special Agent R. J. Lynch. He was requested to take a physical examination, the result of which is enclosed.

This applicant was born November 30, 1919, in Brooklyn, N. Y., and is single. His father was born in Chicago and his mother in New York, and his father is employed as a special policeman by the New York Edison Company. He has an uncle, Howard E. Rothrock, who is employed as a botanist in the National Park Service, Washington, D. C. He advised that no one in his family has ever been arrested or involved in any legal difficulties, and none of them is connected with any subversive organizations.

Applicant was graduated from Mount St. Mary's College, Emmitsburg, Md., in June, 1941, having majored in business administration. He is able to read and write French. His only employment has been during the summers of 1939 and 1940 as an usher during baseball games at Ebbet's Field, Brooklyn, N. Y.

Applicant did not register under the Selective Service Act inasmuch as he was below the age limit on the date of the registration.

This applicant is a very clean-cut type, presents a good appearance and has a good personality. He appears to be intelligent and alert and it is believed that he would be good Special Agent material, inasmuch as he advised that it is his intention to attend law school and apply for the position of Special Agent. Accordingly, he is being recommended favorably.

Very truly yours,

## DETAILS:

EDUCATION

BROTHER PATRICK, Principal, ST. AUGUSTINE HIGH SCHOOL, Park Place and 6th Avenue, Brooklyn, N.Y., stated that their records showed the applicant was born November 30, 1919 and entered that school February 1, 1933; that he graduated June 21, 1937 with a general average of "B", which is equivalent to about 80, and that he considered the student above average. Brother PATRICK further stated that the applicant's attendance record was satisfactory except for the fourth term when he was absent twenty days which resulted in his failing all of his courses for that term; that the applicant failed to take his examinations for that term since he was absent at that time. BROTHER PATRICK stated that he remembered the applicant since he had him in class, as a quiet, respectful boy with a good personality and one who was not a trouble maker.

S.V. NARDO, graduate student, BROOKLYN POLYTECHNIC INSTITUTE, 94 Livingston Avenue, Brooklyn, N.Y., stated that their records showed the applicant registered June 21, 1941 in a primary Civil Aeronautics course; that he was graduated a student pilot, license S-151294. NARDO further stated that the applicant attends classes two nights each week for about four hours each night, and that he should spend about one hour out of three days each week at the flying field where he is receiving further instructions. NARDO stated that the class consisted of 23 men, and while he could not vouch for the applicant he believed him to be all right since three of these men had been "washed up". He suggested that ARCHIE BAXTER, Sunrise Airport, South Ozone Park, N.Y. could give further information regarding the applicant, BAXTER being instructor in flying for the CIVIL AERONAUTICS AUTHORITY.

ARCHIE BAXTER telephonically advised that TULLY is prompt, cooperative, adaptable, always on the job and is a good man in every way.

EMPLOYMENT

Mr. JOHN F. COLLINS, General Manager of the BROOKLYN BASEBALL CLUB, 215 Montague Street, Brooklyn, N.Y., stated that their records indicated the applicant was employed as an usher for 31 days during the baseball season of 1939 and 12 days during the baseball season of 1940, and that his rate of pay was \$3.00 per day. He stated that the applicant's record was clear and that they would reemploy him.

COLLINS advised that it was improbable that anyone would remember the applicant because of the limited time he worked with that organization.

EDWIN R. TULLY

RHL:RSJ

I am the Director of the Federal Bureau of Investigation, United States Department of Justice.

The Federal Bureau of Investigation, United States Department of Justice, has been designated by the President to take charge of investigative work in matters relating to espionage, sabotage and violations of the neutrality regulations. This Bureau is also charged with the duty of investigating other matters bearing upon the maintenance of the internal security of the United States. The duties thus imposed upon this Bureau constitute a vital function in the national defense program of this country. At the present time this Bureau is required by Act of Congress to expand its personnel in order effectively to discharge the important duties devolving upon it.

Edwin R. Tully has been employed as a Clerical Employee by the Federal Bureau of Investigation since August 20, 1941. He was selected for this appointment after an extensive and complete character and fitness investigation had been made. He cannot be replaced satisfactorily because of the shortage of persons with his qualifications for such activity. Individuals appointed to positions in the Federal Bureau of Investigation must not only be of good character but must be in excellent physical condition and within the age group of Selective Service. Extreme difficulty is being experienced at present in obtaining a sufficient number of qualified applicants to take care of the increasing expansion of this Bureau and it is impossible to consider a replacement of any individual for this reason. Immediately upon entering on duty, appointees begin an intensive training course to qualify them in the handling of the confidential and exacting duties of employees of this Bureau. It is suggested that Mr. Tully be given Classification II-B.

Clerk

Grade CAF-2

Efficiency Rating as of March 31, 1942.

This employee is engaged in messenger duties in this office. He is a conscientious worker and an alert and intelligent individual. He has an excellent educational background, since he has already received the degree of B.S. in Business Administration and is now attending his first year at the Fordham Law School in an endeavor to qualify himself for the position of special agent. He appears to be vitally interested in the work of the Bureau and his services require a minimum amount of supervision. He is also amenable to constructive criticism and suggestions and cooperates well with his fellow-employees.

Tully presents a very good personal appearance and has a pleasing personality. I consider him to be a very good employee, one whose services are above the average and also one who has an excellent future in the work of the Bureau.

Mr. J. Edgar Hoover, Director  
Federal Bureau of Investigation

Dear Mr. Hoover:

I have been employed as a Clerk in the New York Field Office since August 20, 1941 and I would now like to realize my ambitions of becoming a Special Agent.

I have a Bachelor of Science degree from Mount St. Mary's College, Emmetsburg, Maryland, where I majored in Business Administration. I have just completed my first full year at the Fordham University School of Law. My height is 5'11½", and my weight is 158 pounds.

I have been placed in a 2B classification by Selective Service Board No. 167 in Brooklyn as a result of my employment in the Bureau.

While I will not be twenty three years of age until November 30, 1942, during my entire scholastic career and up to the present time, I have engaged in a variety of activities which, I believe, have matured me sufficiently to assume the duties of a Special Agent.

Any consideration extended to me in connection with this matter will be very much appreciated.

1. GENERAL IMPRESSIONS OF APPLICANT:

Mr. TULLY attended Mt. St. Mary's College in Maryland from 1937 to 1941 studying business administration. He received a B.S. degree. In September 1941 and to June 1942 he attended Fordham University Law School. He has had no major employment of any kind except that with the Bureau. He started with the Bureau as an Under Clerk August 20, 1941. His present salary is \$1,440.00. Mr. Tully presents a very good personal appearance, has a good personality and an average amount of poise. It was noted, however, that he has only had one year of law school, is only 22 years of age and he is somewhat immature in appearance. In addition, it is felt that he does not have sufficient aggressiveness for a Special Agent. He also lacks mature judgment and discretion.

In view of the above I do not feel that he should be recommended for the position of Special Agent at this time.

1. GENERAL IMPRESSIONS OF APPLICANT:

This applicant attended Mt. St. Mary's College at Emmitsburgh, Maryland from 1937 to 1941 and received a B.S. degree. He attended Brooklyn Polytechnic Institute from June 1941 to August 21, 1941 at which time he left in view of the fact that he had secured a position in the Bureau. The applicant attended Fordham Law School from September 1941 to the present time. He has completed sixteen credits of law and will complete twenty credits by January of 1943. Mr. Tully entered on duty in the Bureau as a messenger on August 21, 1941 and is presently receiving a salary of \$1440., as an underclerk. This applicant was previously examined approximately six months ago and was unfavorably recommended due to his immaturity and possible lack of judgment. Since that time he has been given a new position in this office and his work has been supervised closely. It is noted that he has applied himself diligently and appears to have a sincere desire to progress in the Bureau.

In view of his progress during the last six months it is felt that he should be recommended at this time. He presents a very good personal appearance, has a pleasing personality and poise. He is intelligent and I think he possesses more than the average amount of initiative and aggressiveness.

## Notes for Examining Physician

**WEIGHT.**—Males, without clothing, and also in ordinary clothing without overcoat or hat (weigh twice); females, clothed, but without wrap or hat. If overweight, state whether due to bone and muscle or to fat.

**HEIGHT.**—Without boots or shoes; observe that no appliances are used to increase.

The examination should include the following observations:

1. **Eyes.**—Ptosis; discharge; corneal scar; pterygium. In recording distant vision consider 20 feet as normal and report all vision as a fraction with 20 feet as numerator and the smallest type read at 20 feet as denominator. If glasses are used, record for each eye the finding with and without glasses. Near vision must be reported. In testing vision without glasses the applicant or appointee should be instructed to remove the glasses at least one-half hour before testing uncorrected vision.

2. **Ears.**—Evidence of middle ear or mastoid disease; condition of drums; discharge. In recording hearing, record 20 feet as normal distance for conversational voice and record deviation from normal as fraction with 20 as denominator and actual distance as numerator.

3. **Nose.**—Ability to blow through each nostril. If free, a speculum examination would not be indicated.

4. **Mouth and throat.**—Missing teeth, pyorrhea; tonsils, hypertrophy or disease.

5. **Gastro-intestinal.**—Ulcers, inflammations, etc.

6. **Thyroid.**—Presence of tumor in neck and tremor, exophthalmos; nervous high-strung disposition, especially in women.

7. **Heart.**—Murmurs. State whether functional or organic. If valvular disease exists, state whether or not it is fully compensated. Arteriosclerosis.

8. **Lungs.**—It is necessary that the auscultatory cough be used. If tuberculosis is present, state whether active or arrested; if arrested, state your opinion as to how long it has been quiescent. Sputum to be examined for tubercle bacilli in all suspected cases.

9. **Hernia.**—Give details as to size, location, etc., and whether well-fitting truss is worn. Inguinal hernia exists when ring is enlarged and on coughing visceral impulse is felt which follows the finger on withdrawal.

10. **Varicocele.**—If varicocele is present, state approximate size—e. g., size of walnut, lemon, etc.

11. Flat foot of such a nature as to incapacitate or become aggravated by work or be alleged later to have been caused by accident or occupation. By "flat foot," as used in this form, is meant a weak foot with impaired function; the term being equivalent to "fallen or misplaced arch," an abnormal condition. Impairment of function is the point to be noted. An anatomically flat foot, but strong, is not disqualifying.

12 and 13. Scars, deformities, atrophies, and paralyses should be noted, but it is not important that small insignificant scars or blemishes which might be referred to as marks of identification be recorded.

14. This entry should include symptoms and full history of any mental or nervous abnormality.

15. Urinalysis to be made in case of persons over 40, and in all cases where arteriosclerosis, nephritis, or diabetes is suspected, and when obesity is found on examination.

Gentlemen:

Reference is made to the Selective Service case of Mr. Edwin R. Tully, who is duly registered at your Board as Order Number 2-2127. You will recall that deferment has been requested for this registrant, and as a result thereof, he has been continued in a deferred status.

I desire to advise you that due to his increased technical knowledge which makes it possible to better utilize his services in our highly skilled investigative staff, he was appointed as a Special Agent of this Bureau on January 4, 1943. I thought your Board would desire to have an additional request for deferment showing the change in the position of this registrant. Therefore, I am transmitting herewith, S.S.S. INSTRUCTIONS: This form is to be filled out by an employer or other person who has knowledge of the registrant's eligibility for Class II deferment as a necessary man in his civilian occupation or activity. If the registrant is deferred, the employer must notify the Local Board promptly of any change in the registrant's job status or if his employment is terminated.

The Federal Bureau of Investigation has been designated as the sole civilian government investigative agency having jurisdiction over the investigation of matters pertaining to national defense such as espionage, sabotage, registration of agents of foreign principals, sedition, treason, and the like, and further, the Federal Bureau of Investigation has sole investigative jurisdiction in a great number of other Federal statutes which embrace bank robbery, kidnaping, extortion, white slave traffic, National Motor Vehicle Theft Act, and numerous others. This Bureau has also been designated by Congress as the agency officially responsible for the tabulation and dissemination of police statistics for the entire country. Under an act of Congress these statistics are gathered and are distributed to thousands of interested police and affiliated agencies every six months so that trends in crime, crime records, and crime control can be known to those to whom it is of most interest. Further than this, the Federal Bureau of Investigation has been designated as the agency having jurisdiction over the classification and maintenance of fingerprint records not only on a national basis but on an international basis. The greatest depository of fingerprint records in the world is maintained by the Federal Bureau of Investigation in Washington, D. C. We have over fifty-eight million sets of fingerprints on hand today and are receiving fingerprint records at a rate of approximately 115,000 each day. The military and naval authorities have issued orders that all employees of manufacturing plants operating under contracts with the War Department or Navy Department must be fingerprinted and their fingerprints sent to the Federal Bureau of Investigation for search against our existing files. Obviously the purpose of such an order is to ascertain the criminal background, if any, of persons who are occupying positions where they have access to confidential information and to eliminate from such positions those persons whose records indicate that their interests are not those of our government.

We are also receiving fingerprint records of all persons enlisting or being inducted into the army and other military and naval services. All employees of the Federal government are fingerprinted and their fingerprints searched through our files for prior criminal records, again for the purpose of guarding against the employment of persons in the Federal government whose backgrounds indicate that they might not function to the best interests of our government. We are receiving thousands of criminal fingerprints from all police agencies throughout the country and it is essential that these fingerprints be handled promptly and the contributing agency advised of any prior record so that justice may be intelligently administered. By means of this procedure the Federal Bureau of Investigation is able to identify thousands of fugitives from justice each year who otherwise might not be identified by local police agencies who do not have the benefit of prior criminal records as reflected on fingerprint cards which were made at the time of some previous arrest. Many such persons are wanted for a previous criminal act by some other law enforcement agency and are presently attempting to disguise their true identity through assuming a fictitious name. This ruse on their part is penetrated through the science of fingerprinting and the Federal Bureau of Investigation is enabled to advise the interested local law enforcement agency of the true identity of the individual and he can be held for appropriate prosecutive action, whereas if not identified, he quite possibly would have been released to continue his depredations against society.

Our criminological laboratory handles the scientific examination of evidence in cases investigated by the Federal and local law enforcement agencies. A very high percentage of the work presently being performed by the Technical Laboratory is in connection with the national war effort. Evidence collected in suspected sabotage cases is examined by the scientists in our laboratory who are qualified to handle examinations of almost any technical nature. The personnel in the Technical

Laboratory have been trained through education and experience to handle such subjects as analytical chemistry, qualitative and quantitative analysis, ballistics tests, microanalysis examinations, spectrographic examinations, cryptograph and cryptanalysis work, and many other highly technical examinations.

The Files Section of the Federal Bureau of Investigation contains files on hundreds of thousands of individuals whose activities are of the greatest importance to the country today. It is highly important that we maintain in the Files Section a nucleus of experienced personnel so that the information contained therein can be made readily available to the supervisory personnel of this Bureau and also be made available to other governmental agencies such as the State Department, Military Intelligence Division, Office of Naval Intelligence, and the Immigration and Naturalization service. It is most essential that only the most trusted employees be assigned to this work because of the highly confidential material that is contained in our files.

All of the functions of the Federal Bureau of Investigation are so closely inter-related that it is essential that qualified and experienced personnel be available not only to perform their own work but to train new employees. The Congress of the United States has passed several bills within the past year approving an increase in the personnel. When it is considered that the work of this Bureau is highly confidential it can be appreciated that the selection of personnel must be made with great care. It has been our experience that only one employee is obtained from every one hundred persons who have applied. It is necessary that each employee be investigated thoroughly so that there will be no possibility of having a person in our service who is not loyal to the United States. We have found that it is extremely difficult to secure qualified persons for almost any of the positions that are available. At the present time we have approximately 1,500 employees less than the number that has been authorized by Congress. Every effort is being made to obtain these additional employees as they are badly needed in order for us to properly carry on the work that has been assigned to us. We are endeavoring to obtain these additional persons without interfering in any way with the administration of the Selective Training and Service Act. In all positions where possible we are utilizing the services of female employees. With the exception of Special Agents' and Laboratory Scientists' positions, no appointment of male employees who may be eligible for military service are being made. It is absolutely necessary, however, that our experienced personnel be maintained so that the new personnel can be adequately supervised and trained.

All employees of the Federal Bureau of Investigation have been working at top speed to keep abreast of our duties. The regular work week has been extended to 48 hours, and it has been our experience in the past that an additional amount of overtime will be voluntarily performed by the employees of this Bureau in an effort to properly and expeditiously handle the tremendous volume of important work being referred to us in connection with the war effort. Obviously very little consideration can be given to replacing an experienced employee until such time as we are able to build up our present staff to the number authorized and needed.

Special Agents of the Federal Bureau of Investigation are given twelve weeks of training which embraces 535 hours of study. During that period of time they are trained not only in investigative techniques and procedures, but are qualified in the handling of firearms, mechanical devices, and technical devices in use by the Bureau. After entering the Field service which follows their training period, their skill of course increases with their length of service in the Field. It would

obviously, therefore, be impossible to adequately replace an experienced Special Agent until the replacement had been in the service an equal length of time.

The science of the classification of fingerprints is one of the most exacting in the world today. Employees in law enforcement organizations handling fingerprint activities are of a profession which demands the utmost skill and honesty in the practice of that profession. In the Federal Bureau of Investigation we train Fingerprint Technicians through classroom and practical study for a period of approximately six months. At the end of that time those employees are qualified to examine sets of fingerprints and to identify like sets. This science cannot be taught overnight and the loss of a fingerprint man at any stage of his training or employment is a severe blow to the Federal Bureau of Investigation at this time when we are receiving thousands of sets of prints from all of the coordinated activities of the Government and from local law enforcement agencies.

The Laboratory Scientists of the Federal Bureau of Investigation, all graduate scientists, are thoroughly schooled in the science of criminology and today are performing duties pertaining to the successful war effort one hundred percent of their time. Their training in this field, embracing all sciences of laboratory examination which includes cryptography, chemistry, ballistics, geology, serology, and many others, has been invaluable in the solving of espionage, sabotage, and other subversive activities. It is essential that these scientists many times perform their scientific work in the field under such conditions that they could not be replaced with employees not possessing their physical attributes.

Bureau employees in positions aforementioned and for whom deferments are requested possess technical and scientific skills which renders them irreplaceable to the Federal Bureau of Investigation at this time.

I, J. Edgar Hoover, do solemnly swear (or affirm) that I am the Director of the Federal Bureau of Investigation and that the foregoing statements are true to the best of my knowledge and belief.

Dear Mr. Berrie:

Reference is made to your communication of March 1, 1943, regarding the Selective Service status of Mr. Edwin R. Tully, who is duly registered at your Board as Order Number S-2127. You will recall that deferment has been requested for this registrant by reason of his employment here, and as a result thereof, he has been placed in a deferred status.

Mr. Tully is still employed by the Federal Bureau of Investigation. Under date of January 11, 1943, D.S.S. Form 42-A (Revised) was furnished to your Board advising you of his employment as a Special Agent. In this position he possesses the necessary highly specialized training and technical knowledge so essential to the performance of his duties in connection with the successful war effort that it is not possible to replace him at this time. His removal for induction would cause an impairment of the work we are now performing in order to guarantee the internal security of this country, and accordingly, I desire to request additional deferment in Class II-B.

 LEGAL RESIDENCE - Brooklyn, New York  
 TITLE - Special Agent  
 EDUCATION - B.S., 1941, Mt. St. Mary's  
 PREVIOUS EXPERIENCE - FBI Clerk

Tully comes from New York and is a legal resident of Brooklyn. Following his graduation from college, he attended Fordham Law School for one year. He has attended an aviation ground school, has 72 hours flying credit, and has received 11 1/2 hrs instruction in the air. He at one time held a pilot's license, but same has expired due to his inability to meet the requirement of 15 hours in the air each year. Tully's only experience prior to his employment with the Bureau is an odd job as an usher in the Brooklyn Ball Park for one summer. In August of 1941 he was appointed clerk in the New York Field Division and held that job until his appointment as a Special Agent.

Tully has no outstanding hobbies or accomplishments to bring to the Bureau. He is interested in sports, mainly swimming and golfing.

Tully presents an excellent personal appearance and dresses neatly. He has a medium voice with a New York accent, is confident, forceful, diplomatic, sincere, friendly, and is certainly a good average in his class. He is young in appearance but should prove reliable in the field. It is believed he will bring a seriousness to his work and will show good judgment in general. He has absorbed the course material in a slightly better than average fashion.

A small southeastern office is recommended.

MEMORANDUM FOR MR. LADD

*Edwin R. Tully*

On May 22nd Mr. Rowe inquired of me whether we were investigating one Sophie Nack. After checking the Bureau files I advised Mr. Rowe that we were investigating Sophie Catherine Nack as an employee of the War Manpower Commission and that the investigation was requested by Mr. Gould in accord with the investigative program which Mr. Rowe had worked out with the Bureau of the Budget.

Mr. Rowe stated that Miss Nack had advised him that a Bureau Agent named Anderson had approached her colored maid and asked a number of questions about her personal habits and then had asked the maid not to "advise her boss of the inquiries". Mr. Rowe stated that he thought this was rather sloppy investigative procedure and I told him I would check into it.

I determined from the Washington Field Office that Agent Anderson was handling this case and asked Mr. Maynor to furnish the Bureau with Anderson's justification for such an interview.

There is attached hereto a memorandum received from Agent Edwin R. Tully, of the Washington Field Office, concerning the contact with one Josephine Thomas, a colored maid of the Granite State Apartments, which is the residence of the applicant. You requested that this be called to your attention when it was received at the Bureau in connection with the comment on May 22, 1943 of Mr. James Rowe, Jr., The Assistant to the Attorney General, in which he characterized the investigative procedure of Agent Tully as "rather sloppy."

It appears that Josephine Thomas was not Miss Nack's personal maid although she did clean her apartment as well as the apartments of other people in the building. At the time of the interview, the Agent asked her to maintain his inquiry as confidential.

Section 6-B (c) of the Manual of Instructions, dealing with such investigations, states "Persons interviewed should be requested to treat the inquiries as confidential and the utmost discretion should be used in selecting persons to be contacted."

It appears that Agent Tully was complying with the provisions of the Manual when he conducted this inquiry. It also appears that the investigation was conducted at the request of Mr. George J. Gould, of OEM and that the position for which Miss Nack was applying was one under OEM for the War Manpower Commission. It would therefore seem that Mr. Rowe has absolutely no interest in the matter.

This is one of the investigations for which we receive the sum of \$60.00 and which we conduct only because the President specifically requested us to do so. It is in no way, shape or form connected with the Department of Justice. Mr. Rowe's interest in the matter is not apparent.

Comment: It appears that the person contacted by the agent in this case violated the agent's confidence, as occasionally happens, thereby the fact that Miss Nack was being investigated became known to her, which also is not unusual, and certainly Miss Nack should have no hesitancy in submitting to an investigation unless there are facts and circumstances which she is trying to hide. It is understood that she is the former secretary of Thomas Corcoran, also known as "Tommy the Cork."

Recommendation: In view of the fact that the agent appears to have exercised proper discretion and to have conducted his investigation in accordance with the provisions of the Manual of Instructions, it is recommended that no action be taken concerning him in spite of Mr. Rowe's displeasure.

MEMORANDUM FOR MR. E. A. TAMM

RE: SOPHIE CATHERINE NACK  
OEM EMPLOYEE INVESTIGATION

Upon receipt of a telephone call from Mr. E. A. TAMM on the afternoon of May 22, 1943, requesting advice as to why Agent ANDERSON, of this office, had interviewed the maid of SOPHIE CATHERINE NACK, the subject of an OEM investigation, the writer immediately contacted Special Agent OWEN D. ANDERSON, to whom this case is assigned. Agent ANDERSON advised that he interviewed three references in this case but that he conducted no neighborhood investigation and did not interview the applicant's maid. Agent ANDERSON also stated that Special Agent EDWIN R. TULLY, who reported to this office from the Training Division on April 17, 1943, had been working with him during the week of May 17, 1943, as required by Bureau instructions, and that Agent TULLY had handled the neighborhood inquiries in this case. Agent TULLY was then contacted and instructed to prepare a memorandum as to his contact with Miss NACK'S maid and why it was deemed necessary.

On May 24, 1943, not having received a memorandum, the writer checked with Agent TULLY who advised he had placed same on the writer's desk on the night of May 22, 1943. Thereafter, a search was made of the files and materials in the writer's office for the memorandum with negative results. The Applicant Supervisor and the Chief Clerk's Office were then contacted without success. The aforementioned searching, of course, required a certain amount of time. Since the search resulted negatively, at this time it appeared necessary to obtain another memorandum from Agent TULLY and on May 26, 1943, a message was left for him to submit an additional memorandum. On the afternoon of May 26, 1943, the Applicant Supervisor advised that the investigative file on NACK had been received by him in his incoming mail and for some unexplainable reason, the memorandum submitted by Agent TULLY had been block stamped; searched and serialized and attached to the investigative file. On the morning of May 27, 1943, at which time the writer attempted to contact Mr. TAMM'S office, he received a telephone call from Miss DOROTHY STALCUP, of the Bureau, who inquired about this matter and requested that the memorandum be sent to Mr. TAMM'S office.

In addition to the information contained in Special Agent TULLY'S memorandum, which is attached hereto, he advised the reason JOSEPHINE THOMAS was interviewed is that NACK is crippled and due to this handicap, does not

Mr. TAMM  
NACK  
May 27, 1943

visit with and is not acquainted with the other occupants of 1731 New Hampshire Avenue, N. W. Agent TULLY stated that inasmuch as THOMAS also serves as a maid for other tenants, and in view of the fact that she acts as a maid for Miss NACK, he considered her the most logical person to go to for information concerning Miss NACK. He also advised that JOSEPHINE THOMAS is not the personal maid of Miss NACK but is assigned to keeping her room in order the same as she does for other persons in the building and would be considered more or less of a housekeeper. It is noted that in his memorandum, Agent TULLY states that he requested THOMAS to keep the inquiry confidential.

Respectfully submitted,

MEMORANDUM FOR THE S.A.C.

RE- SOPHIE NACK

This is to advise that on May 19, 1943 the writer contacted one, JOSEPHINE THOMAS, a colored maid, employed by the Granite State Apartments, 1731 New Hampshire Ave., NW Washington, D.C.

THOMAS advised that she has been employed by the Granite State Apartments for the past two years and that she knew Miss Sophie NACK. She related that Miss NACK had recently moved into the Granite Apartments and that she (THOMAS) aided Miss NACK to dress in the morning because Miss NACK was hampered by arthritis. THOMAS said that she then went about the APARTMENT House, cleaning the various rooms. She advised that all she knew about Miss NACK was that she was a good, kind woman. She then stated that she would tell Miss NACK that the writer was asking about her. To dispel any ideas that THOMAS might have been forming relative to Miss NACK's being in any trouble, the writer deemed it advisable to state that Miss NACK had applied for a responsible position with the government. The writer then suggested that the interview remain confidential. THOMAS advised that it would be.

RESPECTFULLY SUBMITTED

RE: SOPHIE CATHERINE NACK  
OEM Applicant

Dear Sir:

I am in receipt of your memorandum of May 22, 1943, concerning your investigation of one Sophie Catherine Nack, an applicant for a position in the Office for Emergency Management.

It is the opinion of the Bureau that you exercised poor judgment in contacting the maid of an individual who was under investigation, as you should know that it is necessary to keep the investigation in a confidential status. It likewise appears that during the course of the investigation you asked the maid a number of questions concerning Miss Nack's personal habits which obviously had no bearing on the case.

This matter was called to my attention by an important Government official who commented that the investigation was conducted in a "sloppy manner".

In view of the fact that you only recently entered the field as a Special Agent, no disciplinary action is being taken at this time; however, I wish to caution you with regard to your activities in cases of this type in the future, and any further instances of such poor investigative procedure will result in severe disciplinary action being taken against you.

TULLY, EDWIN R.  
Special Agent  
60-day Report

EOD 1-4-43

This report is submitted in view of the fact that Agent TULLY reported to the Washington Field Office on April 17, 1943.

This Agent is young in appearance, but otherwise presents a favorable appearance. He dresses neatly and is not lacking in force.

He is rated by the stenographers of this office as a very good dictator, and handles the operation of an automobile satisfactorily. To date he has not had an opportunity to testify in moot court. However, attention will be given to this in the near future. His ability with firearms is average, and I would not hesitate to use him on a dangerous assignment.

*Noted  
C. W. Cox*

Since arrival at the Washington Field Office, he has been assigned to the general investigative desk and has handled both applicant and general investigative cases. He has shown interest and initiative in his work and has performed an average amount of overtime. His reports have contained a minimum of errors, and his work is such that it has required a minimum of supervision. His contacts with law enforcement officials and the public generally have been satisfactory. At this time there has been no indication that he possesses any supervisory, administrative or executive ability.

Agent TULLY'S progress in the Washington Field Office has been satisfactory, and I believe he is entitled to a rating of good at this time.

Special Agent McGivern of the Washington Field Office called and advised that the above-captioned agent had informed that he was at Glen Echo Park last night and during the course of the evening's entertainment he lost the following government property:

One book of Government Transportation Requests No. 28034

(This was a full book and a stop has been placed with the Department according to Mr. McGivern.) *Dept. has informed Carrier Association on this.*

(\*) U. S. Tax Exemption Certificate No. C-7500 (None used).

*BOOK*

(\*) U. S. Tax Exemption Identification Card No. J-9593

Mr. McGivern indicated that Tully had probably lost these articles while he was on one of the rides and he also indicated that he lost his wallet containing \$116. No other government property has been lost.

Agent Tully has conducted a thorough search at Glen Echo and has, likewise, been in contact with the manager in order to determine if any of this property has been turned in, but thus far he has had no results.

I instructed Mr. McGivern to obtain a memorandum from Agent Tully and to transmit it to the Bureau together with their recommendation as to what action should be taken.

MEMORANDUM FOR THE SPECIAL AGENT IN CHARGE

RE: LOSS OF GOVERNMENT PROPERTY

This is to advise that on June 30, 1943, while at Glen Echo Park, the writer lost a wallet containing the following Government property:

1. Book of Government Transportation Requests #28034 (full.)
2. Book of U. S. Government Tax Exemption Certificates #C7500.
3. Tax Exemption Identification Card #J9593.

It is believed that the wallet was lost while on one of the rides at the park. A thorough search was immediately made by the writer but the results were negative.

The manager of Glen Echo Park was informed of the loss and promised to make a further search and notify the writer of any developments. The writer's name and address were contained in the wallet on several personal cards. Due to the fact that \$116 odd dollars in cash were in the wallet, it is possible that someone would decide to keep the money and destroy the contents.

The Chief Clerk's Office of the Bureau was notified of these facts on July 1, 1943.

Respectfully submitted,

EDWIN R. TULLY  
Special Agent

REMARKS:

SAC Hottel by letter dated July 2, 1943, notified the Bureau that Special Agent Edwin R. Tully lost his wallet containing Government Transportation Request Book No. 28034, a book of U. S. Government Tax Exemption Certificates #C7500, and his Tax Exemption Identification Card No. J9593. No information has been received indicating that this property has been recovered.

SAC Hottel recommended that this Agent be suspended for a period of one week.

AGENT'S ANSWER:

By memorandum dated July 1, 1943, Special Agent E. R. Tully advised that on June 30, 1943, while at Glen Echo Park he lost his wallet which contained the above-mentioned Government property. He believed that the wallet was lost while he was one of the rides at the park and although he immediately instituted a thorough search, he was unsuccessful in locating the missing property. He further advised that the manager of Glen Echo Park was informed of the loss and that this individual promised to make a further search and notify him of any developments. Agent Tully stated that his name and address were contained in the wallet on several personal cards but due to the fact that \$116 odd dollars in cash were also in the wallet, it was possible someone would decide to keep the money and destroy the contents.

A BRIEF OF THIS AGENT'S FILE IS ATTACHED.

TULLY, EDWIN R.  
Special Agent  
Transfer Efficiency Report

This report is being submitted in view of the pending transfer of Agent TULLY to the Miami Field Division, and likewise to supplement the report submitted on him under date of June 17, 1941.

With the addition of the following, the comments set forth in the above report still apply.

This Agent testified at a moot court held in this office on June 18, 1943. He presented a neat, businesslike appearance and spoke with clarity and confidence. He answered the questions in a satisfactory manner, and it is believed he will make a satisfactory witness in court.

On June 30, 1943, Agent TULLY exhibited carelessness in that he lost certain government property, together with his wallet, while at the Glen Echo Amusement Park. Because of the above he was given a three days' suspension.

This Agent has continued to show progress in his investigations and his work has been generally satisfactory. However, because of his carelessness with Bureau property, it is believed he is entitled to a rating of only fair, plus at this time.

In (B), there is a slight indentation or gap in the middle of the layer. In (C), the layer is more irregular, with some cells appearing to be missing or shifted, creating a more complex interface.

## SPECIAL AGENTS

This position has been designated as a key position by the Review Committee of the War Manpower Commission.

The Federal Bureau of Investigation has been designated as the sole civilian government investigative agency having jurisdiction over the investigation of matters pertaining to national defense such as espionage, sabotage, registration of agents of foreign principals, sedition, treason, and the like, and further, the Federal Bureau of Investigation has sole investigative jurisdiction in a great number of other Federal statutes which embrace bank robbery, kidnaping, extortion, white slave traffic, National Motor Vehicle Theft Act, and numerous others. The investigative work in connection with the above violations is performed by the Special Agent personnel of this Bureau, who are recruited from applicants between the ages of twenty-three and forty. They must be graduates of a law school or an accounting school with the necessary accounting experience, or graduates of a university with extensive investigative experience, or with linguistic qualifications, or have basic educational training and possess satisfactory prior law enforcement experience which will enable them to satisfactorily perform the duties imposed upon them. For certain of the scientific investigative work, Special Agents are secured who primarily are qualified in the sciences, such as ballistics, chemical analysis, spectography, cryptography, mineralogy, metallography, toxicology, and other like sciences. Applicants for appointment to the position of Special Agent must meet the physical standards and requirements for this position, which are exceedingly high. They must have vision of no less than 20/40 in one eye, 20/50 uncorrected, both eyes to be corrected to 20/20. They must have no color deficiency whatever.

Special Agents of the Federal Bureau of Investigation undergo a rigorous training program. All newly appointed Special Agents in the Federal Bureau of Investigation attend training classes for a period of sixteen weeks; the hours of training are from 9:00 a.m. to 9:00 p.m. daily, which course of study is equivalent to two full years of college study. During this period of training, they are thoroughly instructed in the basic rules and regulations and jurisdictions of the Federal Bureau of Investigation. They must satisfactorily pass numerous written examinations during their period of training. If a trainee fails to pass any of these examinations, he is dropped from the school.

The duties of a Special Agent of the Federal Bureau of Investigation are most arduous. They must be available at a moment's notice to go to any part of the United States or to any assignment outside the United States. The hours of duty for these employees are such that they must be in excellent physical health. The average work week for a Special Agent of the Federal Bureau of Investigation is no less than seventy hours. The work of a Special Agent, regardless of his particular qualification, is such that he cannot lead a sedentary or well regulated life. Due to the small number of Special Agents of the Federal Bureau of Investigation presently handling the work under the jurisdiction of the Federal Bureau of Investigation within and without the continental United States, it is necessary that the entire staff be highly mobile.

Special Agents are required to be able to conduct investigations in more than 100 types of cases, including espionage, sabotage, subversive activities, frauds against the government, kidnaping, extortion, bank robbery, White Slave

Traffic Act, etc. They are trained in and required to maintain constant skill in the use of highly technical equipment, technical processes, such as those necessary for the development of latent fingerprints, concealed or obliterated numbers upon firearms, to understand the use of code messages, to conduct physical surveillances of subjects of espionage and similar cases, sometimes for periods of many months; and when necessary, to assume a necessary character to enable them to fit in an undercover capacity into the activities and operations of groups such as foreign agents, who are engaged in thwarting the war effort.

The arduousness and importance of the work of Special Agents of the Federal Bureau of Investigation was readily recognized by the military and naval leaders. The Chief of the Bureau of Navigation, for the Secretary of the Navy, requested Special Agent employees of the Federal Bureau of Investigation to submit their resignations from reserve commissions held by them in the naval services because it had been determined that those Special Agents could better serve their country in their present assignments than if they were to be called into active naval service. The Secretary of War, in 1942, addressed personal communications to 168 Special Agents of the Federal Bureau of Investigation who at that time held reserve commissions in the Army. The Secretary of War at that time advised the Special Agents that their employment in the FBI is of such vital importance to the national defense as to necessitate their remaining at their posts of duty despite the fact that they held reserve commissions in the United States Army, and the request was made that these Agents, through the proper channels, submit their resignations from their commissions.

General Lewis B. Hershey of the Selective Service System pointed out in his Directive to all Local Boards of December 29, 1941, that Special Agent positions of the FBI were most important and essential to the national health, safety, and interests, and that the national defense functions of the FBI should not be impaired by the removal of trained personnel from critical positions in the Bureau.

The position of Special Agent has always been considered the most critical of all positions in the FBI, since, with the tremendous bulk of work placed upon us due to the war emergency, it is essential that a trained qualified staff be available for the handling of this work. If the Federal Bureau of Investigation cannot continue to retain its personnel in this critical position, aid and comfort would most certainly be given to the enemy and others whose interests are inimical to the best interests of the country today. Up to the present time the full complement of Special Agent personnel has not been secured and every effort is being made to secure the necessary additional Special Agent personnel.

I, J. Edgar Hoover, do solemnly swear (or affirm) that I am the Director of the Federal Bureau of Investigation and that the foregoing statements are true to the best of my knowledge and belief.

SPECIAL EFFICIENCY REPORT - 60-day

EOD 1-4-43

9/30/43

*cert*  
Agent Tully reported for duty at this office on July 25, 1943. He presents a good personal appearance, has a pleasing personality, dresses neatly, and apparently is in good physical condition. He exhibits a good knowledge of his work, apparently possesses initiative, and is a very industrious type of individual. His volume of work is entirely satisfactory. I have had no occasion to criticize his judgment, and his work appears to be accurate. His attitude is apparently entirely satisfactory; he reflects sincerity and conscientiousness in his demeanor.

He is rated above the average in dictating ability. He has not had occasion to testify since his assignment to this district. He operates an automobile satisfactorily. Although I would not assign him at present to dangerous assignments without proper supervision, he has good possibilities along this line. His reports have been satisfactory, and he reflects a good ability to contact officers and business men. He has recently been assigned almost exclusively to Selective Service investigations; and his investigations in this connection have been thoroughly satisfactory, and his reports generally good and require less than average supervision. His investigations also reflect that he is thorough in detail, but not to the point of wasting effort.

I have as yet noted no supervisory, executive, or administrative ability but consider this Agent as possessed of potentialities, and as possibly becoming a good average Agent.

Special Agent EDWIN RAYMOND TULLY  
SPECIAL EFFICIENCY REPORT

2/4/44

This report is submitted in view of the writer's transfer from the Miami Division and in response to Bureau teletype of February 2, 1944.

Agent Tully is possessed of a good, youthful appearance, has a good personality, dresses neatly, and apparently is in good health. Since his assignment to this office he has been working in the Jacksonville territory, and has exhibited a good knowledge of the Bureau's work. He is the type that possesses initiative and utilizes it in his investigations. He is not overly forceful, but is an industrious type of Agent, handles a large volume of work and can carry a heavy case load. His judgment appears to be satisfactory, and his reported matter has been accurate. His attitude toward his work can be considered about average.

*CEW  
BUT  
of*

He has been rated by the stenographers as having a good ability to dictate, and an analysis of production reflects he dictates eight pages per hour, which is about the office average. He operates an automobile satisfactorily. He has testified before the U. S. Commissioner and on arraignment in U. S. District Court, and has made a good impression as a witness. I feel he is capable of handling dangerous assignments under proper supervision, and he has operated satisfactorily on physical surveillances. His rough drafts reflect he can use the typewriter satisfactorily. The reports he has submitted reflect a good ability from an administrative standpoint, and can be considered above the average, necessitating less than average supervision. Inasmuch as he handles a large case load, I feel he is good on organizing and initiating investigations.

I feel this Agent has a good ability to contact officers and business men. He has been handling principally Selective Service cases, but has handled spasmodically investigations involving assignments in the general category.

I do not feel he possesses any executive, administrative, or supervisory ability, although he has had no opportunity to demonstrate such ability. He has not been assigned exclusively to a technical surveillance during the rating period, but for approximately nine days operated on a technical surveillance involving an espionage case. He handles this assignment entirely satisfactorily. Agent Tully is the type that can accept responsibilities and discharge same without close supervision.

To must also investigate and enforce all those federal statutes assigned to the investigative jurisdiction of this Bureau such as: bank robbery, kidnaping, interference with the interstate transportation of goods, National Stolen Property Act, White Slave Traffic Act, etc., the enforcement of which is necessary to the preservation of the national health, safety and interest.

To carry on this work it is necessary to maintain a corps of trained investigators. Mr. Tully is such a trained investigator. In the attached Form 42 S further information relative to Mr. Tully is set forth.

## SPECIAL AGENTS

This position has been designated as a key position by the Review Committee of the War Manpower Commission.

The Federal Bureau of Investigation has been designated as the sole civilian government investigative agency having jurisdiction over the investigation of matters pertaining to national defense such as espionage, sabotage, registration of agents of foreign principals, sedition, treason, and the like, and further, the Federal Bureau of Investigation has sole investigative jurisdiction in a great number of other Federal statutes which embrace bank robbery, kidnaping, extortion, white slave traffic, National Motor Vehicle Theft Act, and numerous others. The investigative work in connection with the above violations is performed by the Special Agent personnel of this Bureau, who are recruited from applicants between the ages of twenty-five and forty. They must be graduates of a law school or an accounting school with the necessary accounting experience, or graduates of a university with extensive investigative experience, or with linguistic qualifications, or have basic educational training and possess satisfactory prior law enforcement experience which will enable them to satisfactorily perform the duties imposed upon them. For certain of the scientific investigative work, Special Agents are secured who primarily are qualified in the sciences, such as ballistics, chemical analysis, spectography, cryptography, mineralogy, metallography, toxicology, and other like sciences. Applicants for appointment to the position of Special Agent must meet the physical standards and requirements for this position, which are exceedingly high. They must have vision of no less than 20/40 in one eye, 20/50 uncorrected, both eyes to be corrected to 20/20. They must have no color deficiency whatever.

Special Agents of the Federal Bureau of Investigation undergo a rigorous training program. All newly appointed Special Agents in the Federal Bureau of Investigation attend training classes for a period of sixteen weeks; the hours of training are from 9:00 a.m. to 9:00 p.m. daily, which course of study is equivalent to two full years of college study. During this period of training, they are thoroughly instructed in the basic rules and regulations and jurisdictions of the Federal Bureau of Investigation. They must satisfactorily pass numerous written examinations during their period of training. If a trainee fails to pass any of these examinations, he is dropped from the school.

The duties of a Special Agent of the Federal Bureau of Investigation are most arduous. They must be available at a moment's notice to go to any part of the United States or to any assignment outside the United States. The hours of duty for these employees are such that they must be in excellent physical health. The average work week for a Special Agent of the Federal Bureau of Investigation is no less than seventy hours. The work of a Special Agent, regardless of his particular qualification, is such that he cannot lead a sedentary or well regulated life. Due to the small number of Special Agents of the Federal Bureau of Investigation presently handling the work under the jurisdiction of the Federal Bureau of Investigation within and without the continental United States, it is necessary that the entire staff be highly mobile.

Special Agents are required to be able to conduct investigations in more than 100 types of cases, including espionage, sabotage, subversive activities, frauds against the government, kidnaping, extortion, bank robbery, White Slave

Traffic Act, etc. They are trained in and required to maintain constant skill in the use of highly technical equipment, technical processes, such as those necessary for the development of latent fingerprints, concealed or obliterated numbers upon firearms, to understand the use of code messages, to conduct physical surveillances of subjects of espionage and similar cases, sometimes for periods of many months, and when necessary, to assume a necessary character to enable them to fit in an undercover capacity into the activities and operations of groups such as foreign agents, who are engaged in thwarting the war effort.

The arduousness and importance of the work of Special Agents of the Federal Bureau of Investigation was readily recognized by the military and naval leaders. The Chief of the Bureau of Navigation, for the Secretary of the Navy, requested Special Agent employees of the Federal Bureau of Investigation to submit their resignations from reserve commissions held by them in the naval services because it had been determined that those Special Agents could better serve their country in their present assignments than if they were to be called into active naval service. The Secretary of War, in 1942, addressed personal communications to 168 Special Agents of the Federal Bureau of Investigation who at that time held reserve commissions in the Army. The Secretary of War at that time advised the Special Agents that their employment in the FBI is of such vital importance to the national defense as to necessitate their remaining at their posts of duty despite the fact that they held reserve commissions in the United States Army, and the request was made that these Agents, through the proper channels, submit their resignations from their commissions.

General Lewis B. Hershey of the Selective Service System pointed out in his Directive to all Local Boards of December 29, 1941, that Special Agent positions of the FBI were most important and essential to the national health, safety, and interests, and that the national defense functions of the FBI should not be impaired by the removal of trained personnel from critical positions in the Bureau.

The position of Special Agent has always been considered the most critical of all positions in the FBI, since, with the tremendous bulk of work placed upon us due to the war emergency, it is essential that a trained qualified staff be available for the handling of this work. If the Federal Bureau of Investigation cannot continue to retain its personnel in this critical position, aid and comfort would most certainly be given to the enemy and others whose interests are inimical to the best interests of the country today.

I, J. Edgar Hoover, do solemnly swear (or affirm) that I am the Director of the Federal Bureau of Investigation and that the foregoing statements are true to the best of my knowledge and belief.

Subscribed and sworn to before me this 15th day of March 1944

Dear General Collins:

Mr. Tully is a Special Agent of the Federal Bureau of Investigation presently assigned to the Miami Field Division of this Bureau. The above-named registrant is presently classified II-B until April 1, 1944.

The Agency Committee of this Bureau is submitting the enclosed D.S.S. Form 42-A Special for your consideration and respectfully requests your approval of the same in order that further occupational deferment may be granted in this case.

Mr. Tully was born November 30, 1919. He holds a B.S. degree from Mount St. Mary's College, Emmitsburg, Maryland. ## SPECIAL AGENTS

DUTIES ACTUALLY PERFORMED: This employee is a Special Agent of the Federal Bureau of Investigation and in such capacity performs criminal and civil investigative work in connection with the many matters under the primary jurisdiction of the Federal Bureau of Investigation. At the present time and since the declaration of the first limited emergency in 1939, Special Agents of the Federal Bureau of Investigation have been utilized a great majority of the time in investigating matters pertaining to espionage, sabotage, counter-espionage, and like matters under the primary jurisdiction of the Federal Bureau of Investigation. This Agent, in his present capacity, is charged with the responsibility of conducting such investigations so that the internal security of the country may be safeguarded. In addition to the many matters of internal security which must be investigated by Special Agents of the Federal Bureau of Investigation, there is also under the jurisdiction of the Federal Bureau of Investigation the enforcement of the kidnapping, extortion, bank robbery, white slavery, motor vehicle theft and numerous other statutes. In performing the duties of a Special Agent in the Federal Bureau of Investigation, every Special Agent must be thoroughly qualified to handle all types of our work. It is not possible to have specialists in one line of endeavor and the work, due to its arduousness, makes it necessary that every Agent be capable of performing arduous physical exertion, that every Agent be fully qualified in the use of all types of firearms utilized by the Federal Bureau of Investigation and that every Agent be appropriately trained in self-defense tactics so that he may take into custody any individual who has been charged with a violation of a Federal statute, regardless of whether it may be necessary to have physical encounter with such an individual in order to effect his apprehension.

It has been necessary for the Federal Bureau of Investigation, since the declaration of the first emergency in 1939 to greatly expand its force. All applicants who possessed the basic qualifications and were appointed to Special Agent positions were given a rigid and extensive course of training covering a period of approximately three months before they were sent to the field to perform actual investigative work.

AVERAGE HOURS WORKED PER WEEK: The regular working hours per week for Special Agents of the Federal Bureau of Investigation are 48 hours; however, for the past 10 years, Special Agents of the Federal Bureau of Investigation have continuously averaged from 70 to 80 working hours per week. The condition of the work of the Federal Bureau of Investigation at this time makes it necessary that the Agents necessarily continue to perform such hours of work. They are not compensated for any work over 48 hours a week, the remaining hours being voluntarily worked by them. In addition thereto, every Special Agent of the Federal Bureau of Investigation must be in continuous contact with his headquarters and is subject to 24-hour duty, many times it being necessary for him to work for extended periods of time without proper food and rest.

HOW LONG WILL IT TAKE TO REPLACE THIS EMPLOYEE: The Federal Bureau of Investigation, under its existing appropriations, is authorized to have 4,853 Special Agents. We have not been able to fully recruit this staff of Special Agents and it cannot at this time be said that this Special Agent can be replaced in the future. The pending work of the Federal Bureau of Investigation, which consists mainly of matters pertaining to the internal security of the country, is in a delinquent condition. At the present time more than 50,000 cases of violations of Federal statutes under the primary jurisdiction of the Federal Bureau of Investigation such as espionage, kidnapping, subversive activities, bank robbery, white slavery, etc., are in a delinquent status. It is essential that our experienced personnel be continued if we are to properly perform the duties imposed upon us due to the present war condition.

The Federal Bureau of Investigation, since the passage of the Selective Service Act, has been no circumspect in the appointment of applicants to positions in this Bureau and when any applicant who may have possessed all of the qualifications for appointment to the position of Special Agent was subject to induction into the military service within any reasonable period of time, he was not given consideration for appointment to the position of Special Agent under any circumstances. In the event an applicant may have been subject to induction in the distant future due to dependency or other classification, favorable consideration was not given his application unless concurrence was given by his Local Draft Board.

Under present conditions, with the manpower problem so acute, the Federal Bureau of Investigation finds it is impossible to recruit draft-free applicants for appointment to Special Agent positions. It is not possible to appoint those physically disqualified or those in advanced years because of the hours which must be worked, and the hardships which must be endured. The physical activity which necessary makes it essential that only those who can withstand the most arduous physical exertion be considered for Special Agent appointments.

DESCRIPTION OF THE ACTIVITIES OF THIS COMPANY: The Federal Bureau of Investigation has been charged by Congress and by the President with the enforcement of certain Federal statutes and the internal security measures promulgated by the Congress and the President. The Federal Bureau of Investigation has sole jurisdiction of the civilian internal security of our country and under such jurisdiction investigates matters pertaining to espionage, sabotage, counter-espionage, activities of foreign Agents, activities of subversive groups and many other matters which pertain to the internal security of the nation. We also have jurisdiction over the investigation of crimes such as kidnaping, bank robbery, extortion, white slavery, automobile theft, impersonation, illegal wearing of uniforms, war frauds and many other crimes against the safety and security of the people of our nation.

In addition to the investigative activities of the Federal Bureau of Investigation, its Identification Division is the largest repository in the world for fingerprint records. Under Congressional Act, appropriating funds for the operation of the Federal Bureau of Investigation, this Bureau is charged with the responsibility of gathering identification data and disseminating it to various law enforcement agencies, government agencies and others who, by law, are entitled to have such information.

The majority of the work of the Identification Division of the Federal Bureau of Investigation at the present time pertains to national defense. During the past year approximately 70,000 sets of fingerprint records were received daily and our total collection of fingerprint records is over 80,000,000 sets. Large numbers of fingerprint records are received daily from the Army, Navy, Coast Guard and affiliated military and naval organizations, from the Civil Service Commission of the United States Government, from law enforcement officials and many prints are being received through law enforcement agencies of persons who are endeavoring to secure employment in national defense industry. It is absolutely essential that these prints be handled promptly, that they be searched through our files and if any of these individuals have previous criminal or police records, that the official Government or law enforcement agency be so advised.

It has been noted by the Federal Bureau of Investigation from a review of fingerprint records received that on a number of occasions those having subversive or other inclinations inimical to the best interests of our country have endeavored to infiltrate, not only into our national defense industries, but into our armed forces so that through devious efforts they might slow down the successful war effort.

In addition to the aforementioned activities, the Technical Laboratory of the Federal Bureau of Investigation, staffed with specialists of proven experience and ability, are performing duties approximately 100% of the time pertaining to sabotage and espionage activities carried on within the borders of our country by those having the Axis interests at heart. Hundreds of cases are received daily in the Technical Laboratory having to do with secret codes, cryptographs, hidden messages, the sabotaging of national defense industry, airplanes, trains and component parts thereof, which evidence must be immediately handled so that the successful war effort of this country can be continued. This work, of course, cannot be continued if qualified technical personnel is not available to handle it.

The Federal Bureau of Investigation at the present time has an authorized ceiling of employees of 13,700. We are approximately 1,200 people short at this time and every effort is being put forth to secure the necessary personnel to fill the positions authorized. This personnel is not being recruited for the mere purpose of filling an authorized quota. It is being recruited because it is absolutely essential, if we are to continue to remain in a current status in so far as our work is concerned, that sufficient personnel be employed to handle the most important tasks being referred to the Bureau for attention today. The investigative work of the Federal Bureau of Investigation is in a delinquent status. The investigative staff, during the last fiscal year, performed uncompensated overtime totalling 3,814,380 hours, and, considering an average staff of approximately 4,500 people performing this overtime over and above the 48 hour week, it can be seen that every effort is being expended by the present investigative personnel of the Federal Bureau of Investigation to maintain the work of the Federal Bureau of Investigation in a current status.

It is essential that the fingerprint records and the technical evidence being forwarded to the Federal Bureau of Investigation for handling be promptly handled and the need for personnel at the Seat of Government mainly stems from the Identification Division wherein the fingerprint records are handled. All employees being recruited for the Identification Division are female. We have not recruited any draft-eligible male employees for such activities for the past several years. The appropriation for the Federal Bureau of Investigation for the next fiscal year is still pending and it cannot at this time be definitely stated the number of personnel which will be allowed for our activities then.

## SPECIAL AGENTS

DUTIES ACTUALLY PERFORMED: This employee is a Special Agent of the Federal Bureau of Investigation and in such capacity performs criminal and civil investigative work in connection with the many matters under the primary jurisdiction of the Federal Bureau of Investigation. At the present time and since the declaration of the first limited emergency in 1939, Special Agents of the Federal Bureau of Investigation have been utilized a great majority of the time in investigating matters pertaining to espionage, sabotage, counter-espionage, and like matters under the primary jurisdiction of the Federal Bureau of Investigation. This Agent, in his present capacity, is charged with the responsibility of conducting such investigations so that the internal security of the country may be safeguarded. In addition to the many matters of internal security which must be investigated by Special Agents of the Federal Bureau of Investigation, there is also under the jurisdiction of the Federal Bureau of Investigation the enforcement of the kidnapping, extortion, bank robbery, white slavery, motor vehicle theft and numerous other statutes. In performing the duties of a Special Agent in the Federal Bureau of Investigation, every Special Agent must be thoroughly qualified to handle all types of our work. It is not possible to have specialists in one line of endeavor and the work, due to its arduousness, makes it necessary that every Agent be capable of performing arduous physical exertion, that every Agent be fully qualified in the use of all types of firearms utilized by the Federal Bureau of Investigation and that every Agent be appropriately trained in self-defense tactics so that he may take into custody any individual who has been charged with a violation of a Federal statute, regardless of whether it may be necessary to have physical encounter with such an individual in order to effect his apprehension.

It has been necessary for the Federal Bureau of Investigation, since the declaration of the first emergency in 1939 to greatly expand its force. All applicants who possessed the basic qualifications and were appointed to Special Agent positions were given a rigid and extensive course of training covering a period of approximately three months before they were sent to the field to perform actual investigative work.

AVERAGE HOURS WORKED PER WEEK: The regular working hours per week for Special Agents of the Federal Bureau of Investigation are 48 hours; however, for the past 10 years, Special Agents of the Federal Bureau of Investigation have continuously averaged from 70 to 80 working hours per week. The condition of the work of the Federal Bureau of Investigation at this time makes it necessary that the Agents necessarily continue to perform such hours of work. They are not compensated for any work over 48 hours a week, the remaining hours being voluntarily worked by them. In addition thereto, every Special Agent of the Federal Bureau of Investigation must be in continuous contact with his headquarters and is subject to 24-hour duty, many times it being necessary for him to work for extended periods of time without proper food and rest.

HOW LONG WILL IT TAKE TO REPLACE THIS EMPLOYEE: The Federal Bureau of Investigation, under its existing appropriations, is authorized to have 4,853 Special Agents. We have not been able to fully recruit this staff of Special Agents and it cannot at this time be said that this Special Agent can be replaced in the future. The pending work of the Federal Bureau of Investigation, which consists mainly of matters pertaining to the internal security of the country, is in a delinquent condition. At the present time more than 50,000 cases of violations of Federal statutes under the primary jurisdiction of the Federal Bureau of Investigation such as espionage, kidnapping, subversive activities, bank robbery, white slavery, etc., are in a delinquent status. It is essential that our experienced personnel be continued if we are to properly perform the duties imposed upon us due to the present war condition.

The Federal Bureau of Investigation, since the passage of the Selective Service Act, has been most circumspect in the appointment of applicants to positions in this Bureau and when an applicant who may have possessed all of the qualifications for appointment to the position of Special Agent was subject to induction into the military service within any reasonable period of time, he was not given consideration for appointment to the position of Special Agent under any circumstances. In the event an applicant may have been subject to induction in the distant future due to dependency or other classification, favorable consideration was not given his application unless concurrence was given by his Local Draft Board.

Under present conditions, with the manpower problem so acute, the Federal Bureau of Investigation finds it is impossible to recruit draft-free applicants for appointment to Special Agent positions. It is not possible to appoint those physically disqualified or those in advanced years because of the hours which must be worked, and the hardships which must be endured. The physical activity which is necessary makes it essential that only those who can withstand the most arduous physical exertion be considered for Special Agent appointments.

DESCRIPTION OF THE ACTIVITIES OF THIS COMPANY: The Federal Bureau of Investigation has been charged by Congress and by the President with the enforcement of certain Federal statutes and the internal security measures promulgated by the Congress and the President. The Federal Bureau of Investigation has sole jurisdiction of the civilian internal security of our country and under such jurisdiction investigates matters pertaining to espionage, sabotage, counter-espionage, activities of foreign Agents, activities of subversive groups and many other matters which pertain to the internal security of the nation. We also have jurisdiction over the investigation of crimes such as kidnaping, bank robbery, extortion, white slavery, automobile theft, impersonation, illegal wearing of uniforms, war frauds and many other crimes against the safety and security of the people of our nation.

In addition to the aforementioned activities, the Technical Laboratory of the Federal Bureau of Investigation, staffed with specialists of proven experience and ability, are performing duties approximately 100% of the time pertaining to sabotage and espionage activities carried on within the borders of our country by those having the Axis interests at heart. Hundreds of cases are received daily in the Technical Laboratory having to do with secret codes, cryptographs, hidden messages, the sabotaging of national defense industry, airplanes, trains and component parts thereof, which evidence must be immediately handled so that the successful war effort of this country can be continued. This work, of course, cannot be continued if qualified technical personnel is not available to handle it.

We are approximately 1,200 people short at this time and every effort is being put forth to secure the necessary personnel to fill the positions authorized. Dear Sir:

The DSS Form 42-A Special requesting deferment of the above named registrant has been presented to our Board for consideration.

In view of the present critical need by the armed forces for men under 26 years of age, directives from higher authority permit the deferment of only those registrants under this age who possess and utilize a rare and unusual skill in a scientific or technical occupation in an activity directly related to the immediate prosecution of the war. The above registrant does not appear to meet these requirements, therefore, we regret that your request for his deferment cannot be approved. This form is returned to you herein..

MEMORANDUM:

RE: EDWIN R. TULLY, Special Agent  
Annual Efficiency Report

Special Agent Tully makes a good appearance, he is rather youthful, has a nice personality, dresses neatly, and seems to be in good health. He is possessed of initiative, is not overly forceful, but makes this up by industrious application to his work, enabling him to carry a rather large case load for an Agent of his experience. His judgment has been satisfactory and he has been accurate in his reports. His attitude is good.

He is rated as a good dictator, his dictation production being equivalent to the office average. He is a satisfactory automobile driver. He has testified before the United States Commissioner and made a good impression as a witness. During the rating period he attained an overall average in the use of all firearms of 89%, indicating that he is possessed of above average proficiency in the use of weapons for an Agent of his ability. He is recommended for dangerous assignments in a limited capacity. He has operated satisfactorily on physical surveillances.

He is a fair typist. (His reports have been well prepared and need only a minimum of supervision.) His contacts have been well handled for an Agent of his experience. In his handling of Selective Service he has done a good job, and his performance to date indicates he has the ability to organize and carry forward a reasonably large number of cases.

During the rating period he has handled some Internal Security, but the bulk of his work has been Selective Service in the Jacksonville Resident Agency district. He has as yet indicated no marked traits of supervisory, administrative, or executive ability; nor has he had such an opportunity. He has not been assigned exclusively to a technical surveillance. He has worked on a technical surveillance, however, in a satisfactory manner. He will accept responsibility and discharge the same without close supervision.

Very truly yours,

R. G. DANNER

Re: EDWIN R. TULLY  
Special Agent

Dear Sir:

Reference is made to your teletype dated May 24, 1944, in which you recommend that the headquarters of this Agent be changed from Jacksonville to Miami in order that he may be assigned to the Foreign Travel Control project.

Prior to approving your recommendation, the Bureau desires additional information. From a review of Agent Tully's file, it is noted that he is twenty-four years of age and has no foreign language ability.

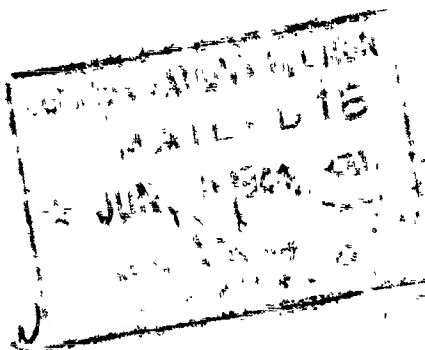

The Bureau feels that more mature Agents should be assigned to the Foreign Travel Control project.

The Bureau desires your advice in this regard.

Very truly yours,

MEMORANDUM:

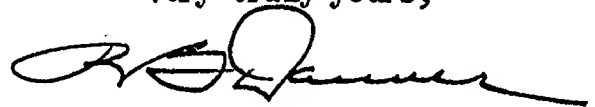

RE: EDWIN R. TULLY, Special Agent;  
Special Efficiency Report.

Since the submission of the annual efficiency report there has been little occasion to change my comments concerning this Agent. He has continued to show improvement.

*W. J. G. mhr*  
He is the type of Agent who, upon having delinquencies called to his attention, will immediately make effort to correct them. He turns out a good volume of work for an Agent of his experience, and needs less than average supervision. He impresses me as being intelligent and possessed of good judgment.

He was recently assigned to the Foreign Travel Control squad but has not had sufficient opportunity to demonstrate his ability along such lines as yet.

Very truly yours,

R. G. DANNER

MEMORANDUM:

RE: EDWIN R. TULLY, Special Agent;  
Transfer Efficiency Report.

Special Agent Tully is a young man of medium build and very good appearance. He dresses neatly and in good taste at all times; is rather quiet but is possessed of a good approach and a smooth manner. He is young yet he impresses me as being level headed, sound, and able to think for himself. He has an abundance of quiet enthusiasm. I believe that he can be sufficiently forceful and aggressive whenever the occasion demands.

He has accepted all assignments in the proper spirit; has had a good background of work in this office. He displays good judgment. His work requires about an average amount of supervision. He is rated as a good dictator; drives an automobile in a satisfactory manner. He has testified before Commissioner's Court, Grand Jury and Federal District Court in this territory; has made a good witness. He is qualified to handle dangerous assignments in a limited capacity but I believe he lacks experience as yet to be assigned in a directive capacity on raids and dangerous assignments. He has handled physical surveillances in a creditable manner.

He is a fair typist; does not take shorthand. His reports are well written, require only a minimum of supervision. He has the ability to handle contact work but it is noted that since his assignment to this district he has developed only one confidential informant, that being in general investigative lines. It is believed that with additional maturity he will develop in this respect.

His ability to organize and initiate investigations is average for an Agent of his experience. He has handled all types of investigations working on road trips.

He has not demonstrated any supervisory, administrative or executive ability, nor has he had an occasion to so demonstrate.

This Agent has not been outstanding in any one respect but he has shown definite progress and it is believed that he will continue to progress.

This Agent is a young man; he is 25 years of age and looks to be about 25. He is slender in build; he presents an excellent appearance; he dresses very neatly. He is quiet in manner, but effective in approaching people and making contacts. Although he is quiet in manner, the way in which he handles investigations indicates that he is sufficiently forceful and aggressive. He is slightly above average in initiative and resourcefulness. During the first part of his assignment in the Knoxville Office from October 4, 1944 to January 9, 1945, he was assigned exclusively to a technical surveillance. His headquarters are fixed at Chattanooga, Tennessee. He has completed his assignment on the technical surveillance and is presently handling general investigative matters in Chattanooga. His work up to the present time has been entirely satisfactory. He impresses me as being conscientious and sincere.

This man is assigned to Knoxville and is Resident Agent at Chattanooga where his work is of a general nature. He is a single man and is very satisfied there. Tully presents a very good personal appearance and has an excellent approach. He is a very clean cut young fellow, dressing neatly and conservatively. He is a confident, business-like individual, having very little to say and not possessed with much outward expression of enthusiasm although he does seem to be quite satisfied and happy.

It is noted that Special Agent JOHN H. GASSAWAY'S headquarters have been changed from Winchester to Knoxville, Tennessee. This makes an opening in the Resident Agents Office at Winchester.

This will also advise that there are presently 4 Resident Agents at Chattanooga, Tennessee. TULLY'S headquarters be changed from Chattanooga to Winchester at the present time. Agent TULLY is qualified to handle the work in the Resident Agency at Winchester. He is single, and it will not be of any particular inconvenience to him to move from Chattanooga to Winchester.

EDWIN R. TULLY  
SPECIAL AGENT

This Agent is a young man; he is 25 years of age and looks to be about 25. He is slender in build. He presents an excellent appearance; he dresses very neatly. He is quiet in manner, but effective in approaching people and making contacts. Although he is quiet in manner, the way in which he handles investigations indicates that he is sufficiently forceful and aggressive. He is slightly above average in initiative and resourcefulness.

This Agent is rated as very good in dictation ability. His work is well prepared, he dictates at a good speed and speaks distinctly. He is a competent automobile driver. This Agent testified in a moot court in the Knoxville Field Division on November 8, 1944. There were no criticisms of his testimony and his rating was excellent. He is qualified to handle dangerous assignments and operate on a physical surveillance. He is a fair typist, but has no shorthand ability. His reports are submitted in very good order and require only a minimum amount of supervision. He makes very good contacts and has shown considerable initiative in organizing and handling investigative matters assigned to him. He has shown an above average willingness to accept responsibility and discharge such responsibility without supervision. He is in good physical condition.

This Agent has worked on Sedition, Selective Service, National Motor Vehicle Theft Act, White Slave Traffic Act, Impersonation, Federal Reserve Act, National Stolen Property Act, Unlawful Flight to Avoid Prosecution, Internal Security, Security Matter and Servicemen's Dependents Allowance Act of 1942 Cases.

He has not demonstrated any supervisory, administrative or executive ability nor has he had occasion to so demonstrate.

The file copy of this efficiency report will be exhibited to this Agent the next time he is in the headquarters city.

This Agent with another Agent did an excellent job during the period covered by this report in questioning and securing signed statements from two subjects in the case entitled "FRANCIS GORDON JEWELL, ET AL, NATIONAL MOTOR VEHICLE THEFT ACT, FEDERAL FIREARMS ACT." In this case the subjects were very reluctant to talk but Agent TULLY stuck with the interviews and by conducting excellent interviews secured the signed statements.

Otherwise, my comments are the same concerning this Agent as set forth in the efficiency report dated March 7, 1945.

RE: PERSONNEL

Dear Sir:

*James R. [unclear]*

Reference is made to SAC letter #108 dated November 28, 1945 instructing that there be submitted to the Bureau by January 15, 1946 a list of those Special Agents assigned to this office who should be considered on a long range basis for development as Special Agents in Charge. This letter indicated that all investigative personnel with the exception of Assistant Special Agents in Charge should be given careful consideration. The following Agents assigned to this office present possibilities for future development as Special Agents in Charge:

Special Agent C. MCAFFEE McCracken has been assigned to this office for approximately three months and is Resident Agent at Chattanooga, Tennessee. Prior to coming to Knoxville Agent McCracken was a supervisor in the Bureau for approximately two years and prior to that has had experience as a Resident Agent at Columbia, South Carolina. Agent McCracken is the outstanding possibility of all the Agents assigned to this office for development as a Special Agent in Charge. He presents an excellent appearance, dresses neatly at all times, and has a likeable personality. It is recommended that he be considered for assignment as an Assistant Special Agent in Charge at this time, since I feel that he is well qualified to handle such an assignment. I have been very favorably impressed with Agent McCracken since his assignment to the Knoxville Field Division.

Special Agent JOHN A. PARKER has been assigned to the Knoxville Field Division for over a year now and for the past six months has been working on a road territory out of Knoxville. This territory is one of the most difficult we have, covering Morristown and Newport, which areas have a reputation all over this section for moonshining and lawlessness in general. Agent PARKER handles his cases in a very satisfactory manner and is able to handle most any type of investigation. He presents an excellent personal appearance, dressing neatly at all times, and is a very good contact man. Before entering the Bureau he traveled all over the country contacting local chapters of his college fraternity. I definitely feel that he should

RECORDED  
INDEXED  
JAN 15 1946

be given consideration for development as a Special Agent in Charge and it is suggested that he be given experience as a Bureau supervisor for awhile and then assigned as an Assistant Special Agent in Charge. Although he comes from the South, he is the type of individual who would fit in in any part of the country. He is already a qualified Bureau speaker and I believe that he would make a very good impression on the public in delivering speeches for the Bureau.

From a longer range standpoint we have two Agents assigned here who I think should be given careful consideration. Special Agent EDWIN R. TULLY is the youngest Agent assigned to this office. However, he has had previous experience as a clerical employee in the New York Field Division. He presents an excellent appearance and has a very likeable personality. At the present time he is assigned as Resident Agent at Chattanooga, Tennessee and is doing a very good job there. It is felt that at the present time he is qualified for a position as a Bureau supervisor and that he will develop in the next two or three year so as to be able to handle the duties of an Assistant Special Agent in Charge and eventually the duties of a Special Agent in Charge.

Special Agent WILBERT W. SMITH is an accountant and is working on general assignment at the present time in this office. Agent SMITH is one of the youngest Agents we have. However, he has an excellent personality and is alert and intelligent. From a long range standpoint it is believed that he merits consideration for development as a Special Agent in Charge. It is recommended that he be given supervisory experience at the Bureau as the first step in his advancement. From all indications at the present time there appears to be no reason why this Agent should not develop to the point where the Bureau would want to consider him as an Assistant Special Agent in Charge and eventually as a Special Agent in Charge. Agent SMITH is single. Although he is from Mobile, Alabama he would fit in in any part of the country.

Very Truly yours

Dear Sir:

For inclusion in the fund to be paid to the widow or designated beneficiary of any Special Agent of the Federal Bureau of Investigation, United States Department of Justice, who had contributed to this fund prior to February 28, 1946, and who dies from any cause except self-destruction while employed as a Special Agent, I am forwarding herewith (by CHECK - ~~NEVER CASH~~) the sum of ten dollars (\$10.00), made payable to the Chief Clerk of said Bureau, to be included in said fund. Payment will be made for death by self-destruction after the Agent has been a member of the fund for two years. It is understood and agreed that the sum tendered herewith is a voluntary, gratuitous contribution to said fund, which I understand is to be administered in the following manner:

The Director of the Bureau will appoint a committee which shall consider all matters pertaining to the acquisition, safe keeping and expending of said fund, which committee will recommend appropriate action to the Director of the Bureau in pertinent matters. The Chief Clerk of said Bureau shall receive all contributions and account for same to the Director.

Upon the death of any Special Agent, the appointed committee will consider the case and submit a recommendation to the Director as to its conclusions. Appropriate instructions will then be issued to the Chief Clerk, directing him to pay to the designated beneficiary the sum of \$10,000.

EDWIN R. TULLY  
SPECIAL AGENT

Agent TULLY presents an excellent personal appearance and has an excellent personality. He dresses neatly and in good taste at all times. He displays sufficient initiative and resourcefulness in his work and is forceful and aggressive.

Agent TULLY is rated as excellent in his dictation and is a capable automobile driver. I have not had an opportunity to hear him testify in court but feel certain that he does a very good job. I would not hesitate to use him on dangerous assignments and I feel certain that he would do a very good job on a physical surveillance. Agent TULLY does not take shorthand but operates a typewriter very well and submits neat rough draft reports. I consider Agent TULLY as somewhat above the average as a report writer. Agent TULLY has no difficulty in contacting law enforcement officials and businessmen in the course of his official duties. He is able to organize and initiate investigations and he accepts responsibility and discharges such responsibility without supervision. He appears to be in excellent physical condition.

During the rating period Agent TULLY has been assigned as Resident Agent at Chattanooga, Tennessee and the great bulk of his work has been the investigation of criminal cases. I feel that he is qualified to handle practically any type of criminal investigation. He was formerly employed as a clerk in the New York Field Division and has a good knowledge of the clerical work in a Field Office. He handles a large volume of work.

Agent TULLY has not had an opportunity to demonstrate any supervisory, administrative or executive ability during the reporting period. However, I feel that he has latent supervisory ability and potential administrative and executive ability. I consider him an excellent Agent in CAF-10.

SAC McCABE:

Agent Tully presents an excellent appearance at all times and dresses neatly and in good taste. He is assigned as Resident Agent at Chattanooga and is doing a very good job there. Although Chattanooga is far removed from his native Brooklyn, he has done an excellent job in adjusting himself to this territory and has made many friends in Chattanooga. Agent Tully covers a rural Chattanooga territory and handles a large volume of work in a very satisfactory manner. Prior to becoming a Special Agent Tully was employed in the New York Field Office as a clerical employee. I believe that he definitely has possibilities for advancement in the Bureau and have recommended to the Bureau that he be given consideration as a Bureau supervisor. I consider him as an excellent Agent in CAF-10.

RATING: EXCELLENT

INSPECTOR NAUGHTEN:

(D. D. Johnson)

Mr. Tully presents a very good appearance and has a pleasant personality. He is self-confident and a creditable representative of the Bureau. This Agent has been in Grade CAF 10 since August 1, 1944, and he received a Ramspeck raise on August 13, 1945. Since August, 1944, he has received one rating of Good, two ratings of Very Good, and it appears that his annual efficiency rating will be Excellent. In view of the above, he is recommended for promotion from Grade CAF 10 to Grade CAF 11. Mr. Tully is interested in an open assignment on SIS and has advised the Bureau of his availability. I consider him good material for this type of assignment. He has no problems.

Dear Sir:

During the investigation conducted by the Knoxville Division to locate McFARLAND the following Special Agents were assigned to work on the case and carried out their assignments in a most efficient manner:

S. LUTHER COULTER	JOHN A. PARKER
CURTIS E. CURLEY	RALPH V. REED
EUGENE C. FENDER	WILBERT W. SMITH
ROBERT B. HERRINGTON	FRANK B. STILL
JACK D. HUGUELET	EDWIN R. TULLY
HERBERT C. MAYS	JOHN H. WILLIAMS (ASAC)

This represents the entire personnel of the Knoxville Division with the exception of Special Agent C. M. McCracken, who was attending In-Service School and was not available to assign to this case. As you know, it was necessary for us to drop everything else and assign every agent available to the McFARLAND case.

Special Agent CURLEY was on annual leave when the case broke and it was necessary for me to cancel his leave and have him return to Knoxville, where he was placed on one of the surveillances. Special Agent SMITH assisted the writer in making the actual apprehension of McFARLAND.

It is recommended that letters of commendation be sent to each of these agents.

RE: EDWIN R. TULLY  
SPECIAL AGENT

This efficiency report is being submitted in view of Mr. TULLY's transfer to the New York Field Division.

He arrived in Knoxville in October, 1944. Agent TULLY presents a very neat personal appearance, dresses tastefully with conservativeness, and has a very pleasing personality. He makes a very good first impression, is mature in appearance and in actions. He appears to be above average in intelligence.

His dictation ability is rated as excellent by the stenographers of this office. He is a qualified automobile driver. I have not had an opportunity to hear him testify or to observe him handling firearms. However, his firearms scores reflect that he is above average in the use of firearms. He is a very good typist but does not take shorthand.

The Source of Information and Confidential Informant files reflect that he has made good contacts while assigned to this office. He has the ability to organize and initiate investigations, appears to have accepted his responsibilities well and carried them out without supervision. He indicates he is in good physical condition. Agent TULLY has been a Resident Agent at Chattanooga, Tennessee, working in the rural area in that section. He has handled general criminal work and appears to have done a very good job. I have not had an opportunity to observe any supervisory or administrative ability on the part of this Agent.

He appears to be above the average in intelligence and in the use of good judgment. He has shown an above average amount of initiative, resourcefulness, force and aggressiveness. His general attitude is excellent. He has been extremely cooperative and a willing worker. He is always available for extra assignments. Further he has shown a large amount of interest in the work he handles.

He is rated as an excellent dictator. He was given an opportunity to testify in Moot Court and received the rating of excellent. His firearms record reflects that he is entitled to the rating of very good and is capable of handling dangerous assignments.
